

DISTRIGO

PARTS DISTRIBUTION

ANNOUNCING A FASTER, MORE STREAMLINED SERVICE

Stellantis have recently opened an extensive new Parts Distribution Warehouse in Ellesmere Port, near Liverpool, to support its Distrigo operation in supplying parts to the Independent Aftermarket and its Authorised Repairers. With an internal covered space of just under 640,000 sq. ft and 223,500 sq. ft of external space, the purpose-built facility (pictured above) allows Stellantis to keep its Genuine parts, Eurorepar, SUSTAINera and Supplier Brand ranges under one roof, ensuring efficient transport flow.

This will noticeably upgrade their supply chain infrastructure and enable a more streamlined service to all Distrigo sites. Using the latest innovative technology, close to 100% of required stock can now be efficiently and promptly distributed throughout the UK to offer more products, enhance availability, and simplify administration.
